

DATACARD® TRUCREDENTIAL™ SUITE

PROTECT WHAT'S IMPORTANT TO YOU

Our integrated approach to issuance and management software, the Datacard® TruCredential™ suite allows you to leverage core technologies across various credential types and applications to meet the unique needs of your program — whether you're serving citizens, consumers, students or employees.

Applications include:

- Student, faculty and visitor IDs
- Employee, contract and visitor badges spanning small to large organizations
- Patient and staff healthcare IDs
- Credentials for local government programs
- Membership and customer loyalty cards, transit passes

Design, Issue and Manage Credentials — Anywhere, Anytime

For organizations large and small, the Datacard® TruCredential™ suite is the easier, intuitive solution for creating, issuing and managing secure IDs and credentials. This powerful software suite — complete with next generation technology — empowers organizations to meet a wide range of application requirements, from basic photo IDs to high-assurance credentials. Designed to meet your needs today and set a solid foundation for the future, it offers a series of feature-rich editions and an enhanced user experience. With TruCredential suite, you can easily scale from a single workstation or user to a multi-workstation, enterprise-wide application with more functionality and less complexity.

Simple Start-Up. Get up and running faster with Quick Start Wizard pre-configured credential design templates, workflow templates for card configuration, capture screens for easy enrollment and data capture. Plus, pre-built support for desktop printers and capture devices empower you to run your credential program with complete confidence.

Powerful User Experience. This web-based software offers a modern approach to the user interface. An intuitive step-by-step set-up and workflow makes it easy to operate, design, print to any device and add multiple users.

Single Technology Platform for Varying Needs. One technology platform to address both Desktop ID and Enterprise ID market segment needs. A future-ready technology supports your features and scalability as your needs grow.

Enterprise Functionality. Built based on best practices and industry standards, this suite optimizes your entire credential issuance process by providing pre-built integration with access control and HR systems. Additionally, it provides centralized data management with high security and scalability support.

NEXT GENERATION ID SOFTWARE

To develop TruCredential suite, we integrated our proven global software products into one modernized platform. This easy to operate software delivers all the tools you need to design, issue and manage life's important credentials — enrollment and data capture capabilities, credential design, workflow tools and enterprise interfaces.

INTUITIVE ISSUANCE

Simplify your program's set-up with the easy-to-use credential designer and workflow designer along with the pre-built workflow templates. Then capture enrollment data and issue credentials with confidence. Whether you capture and issue credentials on a single workstation or multiple workstations, TruCredential suite streamlines the data management process.

Design and issue credentials including QR Code, Bar Code, Magnetic stripe, Smart card encoding, UV, lamination and other features.

TRUCREDENTIAL CAPABILITIES

1. CONFIGURE A WORKFLOW

3. CAPTURE

4. ISSUE A CREDENTIAL

KEY ADVANTAGES

STREAMLINE DATA ENROLLMENT

Capture the physical and logical data you need to create a secure credential. With TruCredential™ suite it only takes a few simple steps to enroll and establish a trusted identity with all of the right elements captured.

FLEXIBLE CREDENTIAL DESIGN

Creating a format for your credential design is easier than ever. Drag and drop the right identity elements, customize the fields and develop unique designs based on pre-built templates.

PRE-BUILT WORKFLOWS

Save time and take the guesswork out of configuring your issuance program. TruCredential™ suite features embedded workflows that allow users to get up and running faster.

PRE-BUILT SMART CARD SUPPORT

Simplify smart card personalization management with pre-built support for leading smart cards.

CENTRALIZED DATA MANAGEMENT

With TruCredential suite, all the information you need regarding enrollees in your program is right in one place. Centrally manage credential designs, workflow templates, printer configurations, distributed user access and permissions — while still allowing data capture and other functions from distributed locations.

REPORTING

Design reports with custom layout, header, footer and data fields. Create and run reports. Export report output in PDF

CENTRALIZED USER MANAGEMENT

Create and manage application users. Role-based access control to restrict/grant user access to specific functions. Self service password reset for users.

FOUR POWERFUL EDITIONS. ONE COMMON PLATFORM.

TruCredential EXPRESS

Take your first step into the world of ID card designing and printing with the entry-level TruCredential EXPRESS.

TruCredential PLUS

This software builds on the functionality of TruCredential EXPRESS to provide the fundamental tools for essential ID card and credential designing and printing.

TruCredential PROFESSIONAL

Get even more capabilities with this highly scalable edition that builds on the functionality of TruCredential PLUS to meet most needs.

TruCredential ENTERPRISE

The most advanced, scalable, enterprise-wide credentialing software in the suite, this edition includes all previous edition features plus sophisticated design capabilities for ultimate program flexibility. It also integrates with access control and HR systems.

SYSTEM REQUIREMENTS

Operating system: Microsoft Windows 7 / 8.1 (32-bit or 64-bit)

Web browser: Chrome, Internet Explorer v10 or v11

Memory: 4 GB (8GB recommended)

Hard Drive: 1 GB of computer drive space

Screen Resolution: 1360 x 768

TRUCREDENTIAL STANDARD FEATURES

Credential Design

- Front and back card design, pre-designed card templates
- Variable/static text field, photo graph field, variable/static graphic field, date field
- QR code, magnetic stripe code, bar code support

Workflow

- Text field, static text field, static graphic field, date field, print count field
- Auto-sequence field, check box field, List field
- Text field mask, field option – read only, hidden, mandatory, searchable

Database & Data Import

- Import data from CSV, ASCII file
- Text field, Static text field, Static graphic field, date field, print count field

Photo Capture

- File input, TWAIN, Microsoft Video for Windows

Languages Support

- English, French, German, Japanese, Portuguese (Brazilian), Simplified Chinese, Spanish
- Localization utility for other languages
